**About Google**

**Sign-in & security**

## Signing in to Google

Control your password and account access, along with backup options if you get locked out of your account.

**Tired of typing passwords? Try using your phone to sign in.**  
[Get started >](#)

**Make sure you choose a strong password**  
 A strong password contains a mix of numbers, letters, and symbols. It is hard to guess, does not resemble a real word, and is only used for this account.

**Password & sign-in method**

Your password protects your account. You can also add a second layer of protection with 2-Step Verification, which sends a single-use code to your phone for you to enter when you sign in. So even if somebody manages to steal your password, it is not enough to get into your account.

**Note:** To change these settings, you will need to confirm your password.

2-Step Verification
?

**Protect your account with 2-Step Verification**

Each time you sign in to your Google Account, you'll need your password and a verification code.  
[Learn more](#)

**Add an extra layer of security**

Enter your password and a unique verification code that's sent to your phone.

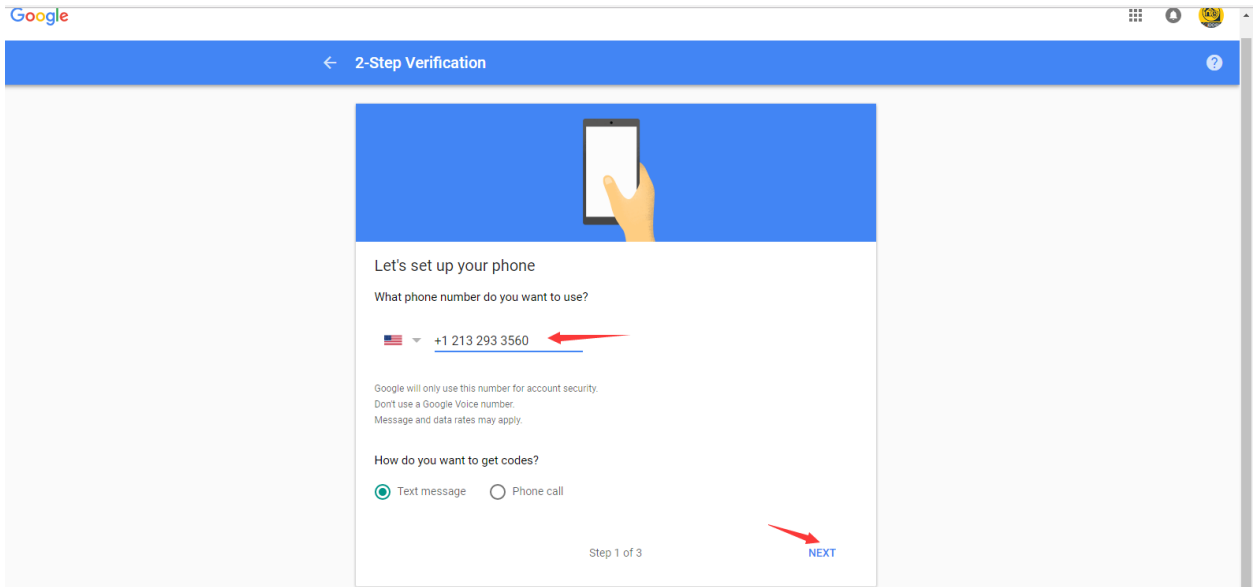

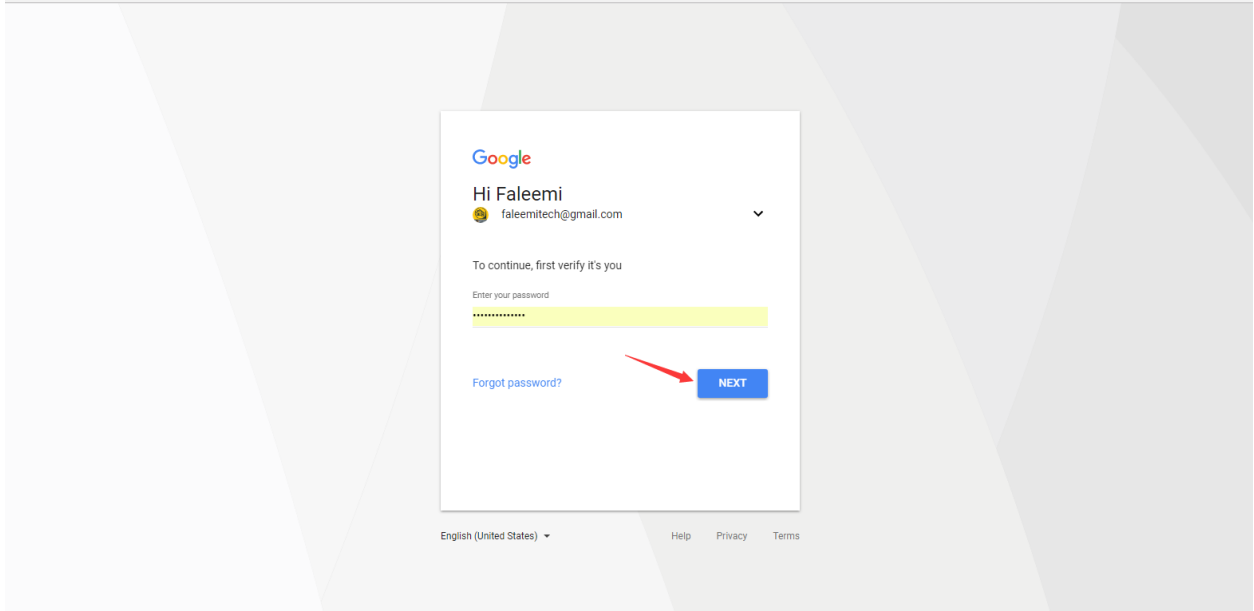

**Keep the bad guys out**

Even if someone else gets your password, it won't be enough to sign in to your account.
