Download the Faleemi APP (Android / iOS) before doing the setup

Connect your mobile device to your WiFi and download the App “Faleemi” from the App Store or Google Play store, or scan below QR code to download it.

Before configuring your camera, please read the points below.

- Please make sure the camera is in the same room, close to the router, before performing the setup. You can relocate it to where you want after it is all set up. You just unplug it and move it to the new location and plug it in, the camera will connect to your WiFi automatically, no need to set it up again.
- Please make sure your phone is connected to your 2.4GHz WiFi (not cellular data and 5GHz WiFi) before doing the setup. Your 2.4GHz WiFi name (SSID) must be different from your 5.0GHz one.
- Please make sure your WiFi name and password do not have the special characters “&” and “‘” (apostrophe).
- If you are not sure, please go to your router settings to find this out.
  Note: THIS WILL NOT AFFECT THE 5GHz WIFI USE OF YOUR OTHER WIRELESS DEVICES :)
  If you don’t know how to go to your router settings, please visit our website www.faleemi.com/blocks/router to find the instructions or contact us at support@faleemi.com.
- If you don’t see the blue light, please do a “Factory Reset”. This process is outlined on Page 30 of this manual. [“5. How to reset your camera (restore to factory default)”.]

Now, please follow below instructions to get your camera set up.
Setup Option A: WPS/QSS Button Setup

Please check if your WiFi router has a “WPS/QSS” button or a WPS icon (See below picture).
Please check your router’s top, 2 sides, back or bottom. If you find it, please follow below steps to do the setup.

If you don’t find it, there are still 2 options for you to set up the camera. Please turn to Page 5 for Setup Option B: One Key WiFi Setup or Page 9 for Setup Option C: Add cameras via WiFi configuration guide.

WPS: Wi-Fi Protected Setup (Wi-Fi Simple Config) is a network security standard to create a secure wireless home network. The standard emphasizes usability and security.

1. Please put your camera close to your WiFi router and plug it in, you will hear “Beep”. The camera is initializing by rotating from left to right and up to down and stop in center finally. And then you will see the red and blue lights are blinking slowly.

Note: when the camera is startup, it will sound one “Beep”.

2. Please press down the reset button for about 3~5 seconds and then let it go.

CAUTION: The button is small. Holding for longer than 10 seconds will reset the camera.

3. When you see the solid blue light, please press the WPS button for 3 seconds on your router before 30 seconds has passed.

You will see the blue light on the camera blinking very fast and then hear 2 Beep. The camera is connecting to your WiFi.

4. Wait for around 30 seconds until you see the blue light is flashing slowly again. And follow Page 7 to add the camera to your mobile/tablet Faleemi APP.

And then you will see the blue light turns on, solid and steady (not blinking).
Setup Option B: One Key WiFi

1. Please put your camera close to your WiFi router and plug it in, you will hear “Beep”. The camera is initializing by rotating from left to right and up to down and stop in center finally. And then you will see the red and blue lights are blinking slowly.

2. Open the Faleemi App, click on the menu icon [More], Click on [One key WiFi].

3. Enter your 2.4GHz WiFi password, Click on [Configuration].

4. After the configuration is succeeded, the camera will sound with 2 Beeps.

Troubleshooting

1. If you see the blue light goes off instead of solid on, the WiFi password you just input may be wrong. Please reset the camera (instructions in Page 30) and do the setup again.

2. If your WiFi password was correct but still failed, the WiFi you were connected may be 5GHz WiFi.

3. If all your WiFi and password were correct, it is still failed, there may be the special characters apostrophe (‘) and ampersand (&) in your WiFi SSID or password.

5. And follow Page 7 to add the camera to your mobile/tablet Faleemi APP.
**Add the connected camera to Faleemi App**

1. Click on [Add Camera].

2. Click on [Add the cameras which are already connected to your WiFi network].

3. Click on [LAN Search].

4. Click on the camera searched.

5. Give your camera a name, and put the default password (123456), click on [        ].

6. You will see it says the camera is Online. Congratulations! Your camera is all set up. Click on the image to enjoy viewing and controlling it now.

---

*Please make sure the phone is connected to the same WiFi as the camera you've connected to.  
1. Click on [Add Camera].  
2. Click on [Add the cameras which are already connected to your WiFi network].  
3. Click on [LAN Search].  
4. Click on the camera searched.  
5. Give your camera a name, and put the default password (123456), click on [        ].  
6. You will see it says the camera is Online. Congratulations! Your camera is all set up.  

---

*Please use the default username of admin and password of 123456 here. You can change them when the camera is all set up. You will find the instructions in Page 28.
1. Please put your camera close to your WiFi router and plug it in, you will hear “Beep”. The camera is initializing by rotating from left to right and up to down and stop in center finally. And then you will see the red and blue lights are blinking slowly. 

2. Open the Faleemi App, click on [Add Camera].

3. Click on [Add cameras via WiFi configuration guide].

4. Please scan the QR Code at the bottom of the camera.

**Setup Option C: Add cameras via WiFi configuration guide**

**Note:**
- If you see this, please click on [OK].
- If you can’t scan the QR Code, please click on [Skip].

Only when it blinks red and blue slowly, should you start to do the setup. It lasts only 5 mins after the camera is powered up.

If you don’t do the setup in 5 mins, please unplug the camera and plug it in again to get another 5 mins setting time.

**NOTE**
Only when it blinks red and blue slowly, should you start to do the setup. It lasts only 5 mins after the camera is powered up.

5 mins

**Setup Option C: Add cameras via WiFi configuration guide**
5. Click on [The blue light is flashing slowly].

6. Type in the name you have selected for your camera and click on [Next].

7. Input your WiFi password and click on [Connect to WiFi].

8. Click on [Start].
1. Connect to WiFi.

2. You can relocate the camera now. Please just unplug it and move it to the new location and plug it in, the camera will connect to your WiFi automatically, no need to set it up again.

* But please make sure the new location will be not far from your router.

9. Connect to WiFi.

When the camera receives the Wi-Fi signal, it will sound with 2 beeps. When the connection is successful, it will take you to the camera page.

10. You will see it says the camera is Online. Congratulations! Your camera is all set up. Click on the image to enjoy viewing and controlling it now.

If the setting is failed, please find below solution or contact us by:

Email: support@faleemi.com
Skype: support@faleemi.com
Phone: 213 293 3560
EST: 6am~10am, 8pm-11pm
PST: 6am~7am, 5pm-12pm

When you call us, please wait some more moment until we pick up the phone.

When the camera receives the WiFi signal, it will sound with 2 beeps.

When the connection is successful, it will take you to the camera page.

Connect to WiFi

Tips: Please check the blue light. If you see it is blinking very fast, which means the camera is connecting to your WiFi, please wait for some more moment.

You will see it says the camera is Online.

Congratulations! Your camera is connected now

1. To ensure the security of your camera, you are suggested changing the default password. Please refer to the instruction in Page 28.
2. You can relocate the camera now. Please just unplug it and move it to the new location and plug it in, the camera will connect to your WiFi automatically, no need to set it up again.

* But please make sure the new location will be not far from your router.

Troubleshooting

1. If you see the blue light goes off instead of solid on, the WiFi password you just input may be wrong. Please reset the camera (instructions in Page 30) and do the setup again.
2. If your WiFi password was correct but still failed.
   (a). Please make sure your phone is connected to your 2.4GHz WiFi (not 5GHz WiFi) before doing the setup.
   (b). Your 2.4GHz WiFi name (SSID) must be different from your 5.0GHz one.
   (c). Please sure your WiFi name and password do not have the special characters " & " and "’" (apostrophe).
If you are not sure, please go to your router settings to find this out.
If you don’t know how to go to your router settings, please visit our website www.faleemi.com/blocks/router to find the instructions.

For more FAQ information, please visit https://www.faleemi.com/faq/
Or contact us: support@faleemi.com
When you slide on the screen, if it doesn’t turn any more, it means it arrives the end of this direction, please turn it in opposite direction.

Tips: turn on the Microphone; you will see a pop-up button “Hold to Talk”, hold this button to talk.
How to connect the camera to the second Phone?

After you use one phone to get your camera connected, if you would like to add your camera to the second phone.

Option A Locally
If your second phone can be connected to the same WiFi as your camera, please follow the instruction in Page 7.

Option B Remotely
If your second phone can not be connected to the same WiFi, please follow below instructions.

1. Download the Faleemi App to your second phone.
2. Open the Faleemi App. Click on [Add Camera].
3. Click on [Add the cameras which are already connected to your WiFi network].
4. Please find your camera DID (something like VIEW-1234567-ABCDE) in your first phone or the label on the camera.
5. Give your camera a name, and input Camera DID, Password, click on [       ]. It will take you to the home page.

Tips:
Default (123456), but if you changed the password on your first phone, please enter your new password here.
Please follow below steps to go to Advanced Settings to do more settings.

1. Click on the icon [   ].

2. Click on [Advanced Settings].

   Advanced Settings
   - WiFi Settings
   - User Settings
   - Time Settings
   - Alarm Settings
   - FTP Settings
   - Mail Settings
   - Memory Card Settings
   - Other Settings
   - Reboot Camera
   - Restore to default
   - About Camera

   Tips: If you change your password, please remember to update the new password to your other phone and click on "   "

Troubleshooting Frequently Asked Questions

1. How do I change my camera password?

To ensure the security of your camera, you are suggested changing the default password.

1. Click on [ ].

2. Select [admin], Click on [ ].

3. Click on [User Settings].

4. Enter your new password, Click on [ ].

5. Enter your new password, Click on [ ].

Record your new password here:
2. If you will be away from your camera for a long time, for example, you will be on holiday for several months, there may be power outage or network disconnection.

We suggest you using Timer Restart option. You can set the camera to reboot by itself during this time period. Please refer to this instruction to do the setup.
http://support.faleemi.com/help/rebot.pdf

3. How do I turn up/down the volume?

1. Click on [ ]
2. Click on [Advanced Settings]
3. Click on [Other Settings]
4. Click on [Volume Setting]
5. Slide on the button to turn up/down the volume and click on [ ]

4. If you have several cameras, please set them up one by one according to the instruction from page 3. After all of them are set up, please follow below steps to use multi-view function.

5. How do I change my video stream resolution?

Click on the icon to change the resolution.

6. I mounted my camera upside down, how do I flip my camera’s video stream?

Click on to flip and mirror your camera.

7. How to reset your camera (restore to factory default)?

Push down the “Reset” button for around 10-15 seconds until the red light changes from blinking slowly to very quickly and then let the Reset button go. If the reset is done successfully, you will hear beep. The camera will reboot automatically.
8. How do I change the WiFi SSID on my router?

Windows 7
https://youtu.be/8gx80SEH5u4

Windows 10
https://youtu.be/V3pgXHVQ67U

MAC
https://youtu.be/qzwRlwLmNPg

For more router settings, please visit https://www.faleemi.com/blocks/router
If there is no the guide for your router settings, please email us at support@faleemi.com

9. How do I find the WiFi MAC address of my camera?

If you need the WiFi MAC address of the camera to connect it to your router, please take the photo of the label on the camera and send it to support@faleemi.com. We will provide you with the WiFi MAC address.
